Our Program Review Process

The contract review process pays special attention to the following:

- Testing the programs against both common and uncommon vulnerabilities
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Ensuring program logic meets the specifications and intentions of the client.
- Cross referencing program structure and implementation against similar programs produced by industry leaders.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- Solana Program Library (SPL)
- Manual Auditing / Sec3 / Neodyme
- Rust Compiler
- Anchor Framework

STPMTA	Mint Authority	**Passed**
STPFRA	Freeze Authority	**Passed**

VULNERABILITY ANALYSIS

ERRORS FOUND

STPUPA: Update Authority

Passed

Status: The Update Authority for the Doge Head Coin has been permanently revoked. This means that the address BNtJs2ZGsv9A1vPkqBozZp1PX4LwtBT3TUicBGXwfKF5 no longer holds the power to modify the token's metadata.

Description: The Update Authority, when active, has the ability to change critical token information such as the token's name ("Doge Head Coin"), symbol ("DHC"), and its associated URI (which often points to the token's image or external metadata).

Vulnerability:

- **None.** With the Update Authority permanently revoked, there is no risk of metadata manipulation. This prevents the token's identity from being altered maliciously, ensuring that investors are protected from potential changes to the token's name, symbol, or redirection to scam content.

- Recommendation:
  - No further action is needed

VULNERABILITY ANALYSIS

ERRORS FOUND

STPTFA - Transfer Fee Configuration Authority

Passed

Status: Not applicable (N/A). No transfer fee configuration authority is specified in the provided data or visible in the standard token metadata.

Description: This authority would manage any fees applied to token transfers. The absence of this detail suggests no transfer fees are currently implemented.

- Recommendation:
  - No further action is needed

VULNERABILITY ANALYSIS

ERRORS FOUND

STPMTA - Mint Authority

Passed

Status: The Mint Authority for this token has been permanently revoked.

Description: The Mint Authority has the power to create, or "mint," new tokens, which would increase the total supply.

Vulnerability:

- None. Because the authority is revoked, no new tokens can ever be created.

- Recommendation:
  - No action is needed.

VULNERABILITY ANALYSIS

ERRORS FOUND

STPFRA - Freeze Authority

Passed

Status: Not applicable (N/A). No freeze authority is set.

Description: A freeze authority would allow the team to lock token holders' accounts, preventing transfers. The absence of this authority means no one can freeze tokens.

- Recommendation:
  - No further action is needed
